### VERMICULITE INSULATION ASBESTOS TEST

**\$80 per sample** includes quantitative laboratory analysis and interpretative report  
Results in 2 business days upon receipt of sample(s). Call for rush pricing.

#### DIRECTIONS

1. Collect a minimum of three (3) separate samples from random areas.
2. Collect 1 - 2 cups of insulation for each of the three (3) samples, each in its own bag, taken from the bottom half of the insulation in the attic or from the bottom of the wall cavity (the asbestos tends to settle to the bottom). It is very important to take samples from the bottom half of the insulation; just move the top half aside before sampling.
3. Place the 3 samples in a larger zip lock bag, complete the submission form\* and mail to Absolute Labs.  
\*A signature is required for analysis.

Note: Avoid exposing yourself to any more dust than necessary during the collection and do not remain in the area longer than necessary. The use of a NIOSH approved particle respirator and filter (e.g., N95, P100) is recommended.
