ASBESTOS IDENTIFICATION – ALL MATERIALS EXCLUDING VERMICULITE

\$60 per sample includes quantitative laboratory analysis and interpretative report

Results in 2 business days upon receipt of sample(s). Call for rush pricing.

DIRECTIONS

1. Prepare a spray bottle with water and a few drops of liquid soap. Liberally spray material(s) to be sampled and allow to soak; this process helps prevent potential asbestos fibers from becoming airborne.
2. A representative sample containing all material layers or types is required. Please provide a few grams of sample approximately 2in x 2in minimum.
3. Place each sample in its own sealable bag and label the bag (e.g., sample #1) and corresponding sample description on the submission form (e.g. basement pipe wrap).
4. Fill out the remainder of the form* and mail to the address in the header. **A signature is required for analysis.*

Note: Avoid breathing and exposing yourself to more dust than necessary during the collection. Do not remain in the area longer than necessary. The use of a NIOSH approved particle respirator and filter (e.g., N95, P100) is recommended.

TEST SITE AND REPORTING INFORMATION

Sample #1 description: _____

Sample #2 description: _____

Sample #3 description: _____

Site address or project no.: _____

Sampler's name: _____ Date taken: _____
