LEAD IN WATER TEST

\$45 per sample includes quantitative laboratory analysis and interpretative report
NEXT DAY RESULTS on samples received before 12:00PM EST M – TH (call for rush results)

DIRECTIONS

- 1. Fill the sample container entirely with the first draw of water coming from the cold water supply. The first draw will have a higher concentration of lead, if present. Note: consider testing first draw of water from both the cold and hot water supply, and the water after it has ran for 5 minutes from the cold and hot water supply. This testing requires four (4) unique samples but will give you the most information about potential lead leaching.
- 2. Replace cap, insure the bottle does not leak.
- 3. Fill out bottle label, complete the form below. **A signature is required for analysis.*
- 4. Return the bottle and completed form to the shipping container and ship to Absolute Labs.
